How to Create or Modify a Test

Overview

This topic describes how to create a Test.

Find this page

Click Test Manager in the Assessments area on the Control Panel to open the Test Manager.

How to create a Test

Follow the steps below to create a Test.

1. Select Add Test on the Test Manager page.
2. Enter a name, description, instructions and click Submit.
3. Select a question type on the Test Canvas and click Go.
4. Create a question.
5. Enter the Point Value for the question.
6. Attach a file or URL.
7. Enter answers to choose from and select the correct answer.
8. Enter feedback that Students will see based on their answer.
9. Repeat Step 3 through Step 8 until finished adding questions.

How to make a Test available

Follow the steps below to make a Test available.

1. Open a Course area and select Add Test.
2. Select the Test to add and click Submit.
Test Info

Overview

On the Test Info page the Instructor begins creating a test by selecting a name, description, and instructions.

Find this page

Follow the steps below to open the Test Info page.

1. Select Test Manager in the area of the Control Panel.
2. Click Add Test.

OR

1. Select Test Manager in the area of the Control Panel.
2. Click Modify next to an existing Test.
3. Click Modify in the first section on the Test Canvas.

Fields

The table below details the fields on the Test Info page.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Test Info</td>
<td></td>
</tr>
<tr>
<td>Name [r]</td>
<td>Enter the name of the Test. If the Test name is changed after it is created the name of the test in the Grade Center will not be changed. To change the name of the Test in the Grade Center as well, edit the Item Information in the Grade Center.</td>
</tr>
<tr>
<td>Description</td>
<td>Enter a description of the Test.</td>
</tr>
<tr>
<td>Instructions</td>
<td>Enter instructions for the users taking the Test.</td>
</tr>
</tbody>
</table>
Test Canvas

Overview

The Test Canvas page is the center of the Test creation process. Instructors can modify the Test name and instructions, add and modify questions on the Test, and view Tests. With the exception of minor text changes, such as correcting a typo, Assessments should not be modified if Students have already begun taking the Assessment.

Find this page

Follow these steps to open the Test Canvas page for an existing test.

1. Select Test Manager in the Assessment area of the Control Panel.
2. Click Modify next to an existing Test.

Follow these steps to open the Test Canvas page for a new test.

1. Select Test Manager in the Assessment area of the Control Panel.
2. Click Add Test.
3. Complete the Add Test page and select Submit.

Functions

The functions available on the Test Canvas page are described in the table below.

<table>
<thead>
<tr>
<th>To . . .</th>
<th>click . . .</th>
</tr>
</thead>
<tbody>
<tr>
<td>add a question</td>
<td>the drop-down menu in the Add Question: field, select a type of question to add and click Go.</td>
</tr>
<tr>
<td>add a question in between existing questions</td>
<td>the drop-down menu in the Add Question: field, select a type of question to add and click Add Question Here in the location where the question should appear.</td>
</tr>
<tr>
<td>change the settings for this Test</td>
<td>Creation Settings. The Test Creation Settings page will appear. Creation Settings enable the Instructor to adjust the default point value, options for question feedback and the inclusion of images.</td>
</tr>
<tr>
<td>change the name, description, or instructions for the Test</td>
<td>Modify to the right of the Name, Description, and Instructions.</td>
</tr>
<tr>
<td>change the order of the questions</td>
<td>the drop-down list to the left of the question header. Select a new order for the questions using the numbers in the drop-down list.</td>
</tr>
<tr>
<td>modify a question</td>
<td>Modify to the right of the question header.</td>
</tr>
<tr>
<td>remove a question</td>
<td>Remove to the right of the question header. A confirmation box will appear. Removing a question is irreversible.</td>
</tr>
</tbody>
</table>
Test Creation Settings

Overview

The Test Creation Settings page allows Instructors to adjust settings for a Test. These settings control options, such as question feedback, categorization of questions, and default point value.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Creation Settings</strong></td>
<td>Select this check box to include the option to enter feedback for individual answers rather than just one set of feedback for correct or incorrect answers. Individual feedback cannot be provided for answers in True/False questions, Multiple Answer questions, Ordering and Matching questions.</td>
</tr>
<tr>
<td>Provide feedback for individual answers</td>
<td></td>
</tr>
<tr>
<td>Add images, files, and URLs to questions</td>
<td>Select this check box to include the option to attach images, files, and URLs to questions.</td>
</tr>
<tr>
<td>Add images and files to answers</td>
<td>Select this check box to include the option to attach images and files to answers.</td>
</tr>
<tr>
<td>Add categories and keywords to questions</td>
<td>Select this check box to include the option to create categories for questions. This option also enables Instructors to add keywords to questions. When searching for questions from a Question Pool or other Tests, Instructors may search for questions by category and keyword.</td>
</tr>
<tr>
<td>Specify default point value for questions</td>
<td>Select this option and all questions will automatically have the same point value. Enter the point value in the Default point value field. This only sets a default.</td>
</tr>
</tbody>
</table>

Note: The Pool Creation Settings page and Survey Creation Settings page function in the same way as the Test Creation Settings. The differences are the Specify default point values for questions option is not available on the Pool Creation Settings page or the Survey Creation Page. Also, the Add Categories to questions option is not available on the Survey Creation Settings page.

Find this page

Follow the steps below to open the Test Creation Settings page.

1. Select Test Manager in the Assessment area of the Control Panel.
2. Click Add Test.
3. Complete the Add Test page and select Submit.
4. Select Creation Settings.

Fields

The table below details the fields on this page.
<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Specify partial credit options for answers</strong></td>
<td>Select this option to make partial credit available for questions included in this Assessment. If selected, an option to give partial credit appears when questions are created.</td>
</tr>
<tr>
<td><strong>Specify extra credit option for questions</strong></td>
<td>Select this option to make extra credit available for questions included in this Assessment. If selected, an extra credit option appears when each question is created. This option allows the Instructor to make the questions an extra credit questions as opposed to a regular question. If this options is selected points are added to the score if the question is answered correctly; no points are taken away if the questions are answered incorrectly.</td>
</tr>
</tbody>
</table>

**Default Point Value**

Instructors must set the Default Point Value before creating questions for it to be effective. If the default point value is changed, only questions created after it is modified will have the new point value. Questions created before the modification will have the old point value. For example, set the Default Point Value to ten then create questions in the Assessment. These questions will have a point value of ten. Next, change the Default Point Value to 15, and create additional questions in the Assessment. These new questions will have a point value of 15, but the questions created initially will still have a point value of ten.
Question Completion Status

About Question Completion Status

The Questions Status Indicator is a tool to provide users with a quick up-to-date look at their progress (complete or incomplete questions) in an assessment at all times. The Save button next to each question provides a visual reminder to Students to save their work periodically.

Completion status of assessment questions is displayed at the top of the page when a Student is taking an assessment. The status of which questions have been answered is displayed at the top of the page, just below the Name and Instructions box.

When the user answers a question and moves on to the next question in a question-by-question assessment, the status box will be updated on the next page to show that the previous question was answered. If the user does not answer a question and moves on to the next page in a question by question assessment, the status box will show on the next page that the previous question was not answered. The user can navigate between questions by clicking on the question number in the status indicator. This is applicable only to assessments deployed all at once or question by question where backtracking is permitted.

While taking an all-at-once assessment, the user will be able to use a Save button to the right of each question to save this specific question without scrolling to the bottom of the page to save. Saving either a single question or all of the questions that have been answered (with the Save button at the bottom of the page) changes the status indicator to show which questions have been completed.
**Question Metadata**

**Overview**

Instructors have the option to create categories, keywords, Learning Objectives, and Levels of Difficulty for questions to help organize them for future use.

| Note: The Question Metadata options are only available if Add categories and keywords to questions are selected in Creation Settings. |

**Add Metadata to a Question**

Follow these steps to add metadata to a question.

1. Select **Test Manager** in the Assessment area of the Control Panel.
2. Create a new Test or select **Modify** next to an existing Test.
3. Select a new question in the **Add Question** field or select **Modify** next to an existing question.
4. Click **Categorize** to add a category, **Set Learning Objective** to add a Learning Objective, or **Set Level of Difficulty** to add a Level of Difficulty. For Keywords, enter the words, separated by commas, directly into the **Keywords** field.
5. Select a value from the drop-down list and click **Add**. The metadata will be assigned to the question. To organize the list of available values, click **Manage**.

**Manage Metadata**

Metadata values can be added, removed, and changed. Metadata created in one question can be used when creating other questions in the same Course. Follow these steps to add values for metadata.

1. Select **Test Manager** in the Assessment area of the Control Panel.
2. Create a new Test or select **Modify** next to an existing Test.
3. Select a new question in the **Add Question** field or select **Modify** next to an existing question.
4. Click **Manage Categories**, **Set Learning Objective**, or **Set Level of Difficulty**.
5. To add a value to the list of available values, enter it in the field and click **Add**. Available values appear below. Click **Modify** to change the name of a value or **Remove** to delete the value from the list.
Multiple Choice Questions

About Multiple Choice Questions

Multiple-choice questions allow the users a multitude of choices with only one correct answer. In multiple-choice questions, users indicate the correct answer by selecting a radio button. The number of answer choices is limited to 20.

Note: Use the Multiple Answer question type to create multiple choice questions with more than one answer.

Find this page

1. Open the Test Canvas for an assessment.
2. Select Multiple Choice from the question type drop-down list. Click Go.
3. Enter the Question Text.
4. Assign a Point Value and complete the partial credit options if necessary.
5. Select the number of answers and complete the answer options.
6. Complete any advanced features for the questions as defined by the Creation Settings of the assessment.
7. Click Submit to add the question to the assessment.
True/False Questions

About True/False Questions

True/False questions allow the user to choose either true or false. True and False answer options are limited to the words True and False.

Create a True/False question

1. Open the Test Canvas for an assessment.
2. Select True/False from the question type drop-down list. Click Go.
3. Enter the Question Text. This should be in the form of a statement that users will mark either True or False.
4. Assign a Point Value.
5. Select the Answer Orientation and correct answer for the question.
6. Complete any advanced features for the questions as defined by the Creation Settings of the assessment.
7. Click Submit to add the question to the assessment.
Fill in the Blank Questions

About Fill in the Blank Questions

Fill in the Blank answers are evaluated based on an exact text match. Accordingly, it is important to keep the answers simple and limited to as few words as possible. Answers are not case sensitive, but are evaluated based on spelling. Consider the following tips when creating Fill in the Blank questions and answers:

- Provide answers that allow for common spelling errors.
- Provide answers that allow for abbreviations or partial answers.
- Create the question that indicates to Students the best way to answer the question.
- Phrase the question so there is only one answer.

Try to keep answers limited to one word to avoid mismatched answers due to extra spaces or order of answer terms. If the answer may be more than one word, list all possibilities as answers. For example, if Benjamin Franklin is the answer, include Benjamin Franklin, Franklin, and Ben Franklin as correct answers.

Note: Use the Fill in Multiple Blanks question type to create a question with multiple answers.

Create a Fill in the Blank Question

1. Open the Test Canvas for an assessment.
2. Select Fill in the Blank from the question type drop-down list. Click Go.
3. Enter the Question Text and assign a Point Value.
4. Enter all of the possible answers to the question.
5. Complete any advanced features for the question as defined by the Creation Settings of the assessment.
6. Click Submit to add the question to the assessment.
Multiple Answer Questions

About Multiple Answer Questions

Multiple answer questions allow users to choose more than one answer. The number of answer choices is limited to 20. This type of question may be used when more than one answer is correct; users can select the incorrect answers. For example, in the medical field, this type of question may be used to select symptoms associated with a medical condition.

Create a Multiple Answer Question

1. Open the Test Canvas for an assessment.
2. Select Multiple Answer from the question type drop-down list. Click Go.
3. Enter the Question Text and assign a Point Value.
4. Select options for how answers are displayed. This includes:
   - **Answer Numbering**: determines how the answers are numbered
   - **Answer orientation**: determines if answers appear vertically or horizontally
   - **Allow Partial Credit**: select if partially correct answers receive any credit. Students will receive partial credit for each correct answer and be deducted an equal measure of partial credit for each incorrect answer. The amount of partial credit for each answer is derived from the total number of points for the question divided by the number of answers. Negative points are not given, 0 is the lowest score for the question.
   - **Show Answers in Random Order**: displays answers in a random order when users take the assessment
5. Enter the number of answers and complete the text box for each answer. Indicate the correct answers by selecting the check box to the left of the question.
6. Complete any advanced features for the question as defined by the Creation Settings of the assessment.
7. Click Submit to add the question to the assessment.
Matching Questions

About Matching Questions

Matching questions allow Students to pair items in one column to items in another column. Instructors may include a different numbers of questions and answers in a Matching question. For example, the question may include a list of animals and a list of food they eat (herbivore, carnivore, omnivore). The users would match each animal with their diet.

Students will be granted partial credit for matching questions if they answer part of the question correctly. For example, if the question is worth eight points and the Student gives the correct answers for half of the matches, they will receive four points.

Create a Matching Question

1. Open the Test Canvas for an assessment.
2. Select Matching Question from the question type drop-down list. Click Go.
3. Enter the Question Text and assign a Point Value.
4. Select options for question layout and partial credit.
5. Select the number of questions and enter the text for each question. The number of questions and answers may be uneven. For example, the Instructor may include extra answers to make the question more difficult.
6. Select the number of answers and enter the text for each answer. Click Next.
7. Match each Question with the correct Answer.
8. Complete any advanced features for the question as defined by the Creation Settings of the Assessment.
9. Click Submit to add the question to the assessment.
Ordering Questions

Overview

Ordering questions require users to provide an answer by selecting the correct order of a series of items. For example, an Instructor may give users a list of historical events and ask them to place these events in chronological order.

Users will be granted partial credit for ordering questions if they answer part of the question correctly. For example, if the question is worth eight points and the Student gives the correct order for half of the items, they will receive four points.

Create an Ordering Question

1. Open the Test Canvas for an assessment.
2. Select Ordering Question from the question type drop-down list. Click Go.
3. Enter the Question Text and assign a Point Value.
4. Select options for numbering and partial credit.
5. Select the number of answers and enter them in the correct order. Click Next.
6. Select the order in which to display the answers.
7. Complete any advanced features for the question as defined by the Creation Settings of the Assessment.
8. Click Submit to add the question to the assessment.
Essay Questions

Overview

Essay questions require the Instructor to provide Students with a question or statement. Students are given the opportunity to type an answer into a text field. Sample answers can be added for users or Graders to use as a reference. These types of questions must be graded manually on the Grade Assessment page. Essay questions may use the Math and Science Notation Tool.

Note: A Short Answer Question type is also available; this question type allows the Instructor to limit the length of the response. Like Essay questions; Short Answer Questions are manually graded. Other Question types that allow user input are File Response, Fill in the Blank, and Fill in Multiple Blank.

Create an Essay Question

1. Open the Test Canvas for an assessment.
2. Select Essay Question from the question type drop-down list. Click Go.
3. Enter the Question Text and assign a Point Value.
4. Enter a sample answer for users to view with the question.
5. Click Submit to add the question to the assessment.
Calculated Formula Questions

About Calculated Formula Questions

A Calculated Formula question contains a formula, the variables of which can be set to change for each user. The variable range is created by specifying a minimum value and a maximum value for each variable. Answer sets are randomly generated. The correct answer can be a specific value or a range of values. Partial credit may be granted for answers falling in a range.

Since this question allows the Instructor to randomize the value of variables in an equation it may be useful when creating math drills to when giving a test when Students are seated close together.

Adding a calculated question to an Assessment is a three step process:

- Create the question and formula.
- Define the values for the variables.
- Confirm the variables and answers.

Create the Question and Formula

The question is the information presented to Students. The formula is the mathematical expression used to find the answer. Be sure to enclose variables in square brackets.

Follow these steps to create the question and formula:

1. Open the Test Canvas for an assessment.
2. Select Calculated Formula from the question type drop-down list. Click Go.
3. Enter the information that will display to Students in the Question Text box. Surround any variables with square brackets, for example, \([x]\). The value for this variable will be populated based on the formula. In the example \([x] + [y] = z\), \([x]\) and \([y]\) will be replaced by values when shown to Students. Students would be asked to define \(z\). Variables should be composed of alphabets, digits (0-9), periods (.), underscores (_) and hyphens (-). All other occurrences of the opening rectangular brace ("[" character should be preceded by the back-slash ("\" character. Variable names must be unique and cannot be reused.
4. Define the formula used to answer the question in the Formula box. For example, \(x + y\). Operations are chosen from the buttons across the top of the Formula box.
5. Assign a point value for the question. Several other options may appear based on the Creation Settings.
6. Set the Answer Range. This defines which submitted answers will be marked correct. If the exact value must be entered, enter 0 and select Numeric from the drop-down list. If the answer can vary, enter a value and select Numeric or Percent. Numeric will mark every answer as correct that falls within a range of plus or minus the Answer Range from the exact answer. Percent will mark every answer as correct that falls within a percentage of plus or minus the Answer Range from the exact answer.
7. Select Yes or No for Units Required. If Yes, correct answers must include the correct unit of measurement, for example, Seconds or Grams. Enter the correct unit of measurement and choose if the unit of measurement is case sensitive. The answer may still receive partial credit if the unit of measurement is not correct. Enter a percentage in Unit Points Percentage. The unit of measurement will account for that percentage of the total credit.
8. Define partial credit for answers that fall outside the correct AnswerRange. Select Yes or No for Allow Partial Credit. Enter a value for the Partial Credit Points Percentage. Now, set the range for partial credit by entering a value and selecting Numeric or Percent for the Partial Credit Range. Answers falling within this range will receive a portion of the total points possible for the question equal to the Partial Credit Points Percentage.

9. When finished with the question, click Continue to proceed.

**Define the Variables**

The next page in the three step process defines the variables in the formula. Follow these steps to define the variables.

1. For each variable, set a minimum and a maximum value.
2. For each variable, select a decimal place using the drop-down list that appears in the Decimal Places column.
3. Under Answer Set Options, select the Decimal places for answer from the drop-down list. Users must provide the correct answer to this decimal place.
4. Enter the number of different Answer Sets. The Answer Sets will be randomized so that different Students will be presented with a different set of variables.
5. Click Continue to proceed. Or, Click Back to return to the previous page or click Calculate to reset the variables after making a change.

**Confirm the Variables and Answers**

The last step in the process displays the Answer Sets in a table. For each set, each variable and the answer are displayed. Make any changes or remove any unwanted answer sets and click Calculate.

Below the Answer Sets are the standard options for adding feedback and metadata to questions.
Calculated Numeric Response Questions

About Calculated Numeric Response Questions

This question resembles a fill-in-the-blank question. The user enters a number to complete a statement. The correct answer can be a specific number or within a range of numbers. Please note that the answer must be numeric, not alphanumeric. For example, in a Geography class the Instructor may ask for the estimated population of a specific city.

Create a Calculated Numeric Response Question

Follow these steps to create a Numeric Response question.

1. Open the Test Canvas for an assessment.
2. Select Numeric from the question type drop-down list. Click Go.
3. Enter the Question Text.
4. Assign a Point Value. Complete any advanced features for the question as defined by the Creation Settings of the assessment.
5. Enter the Correct Answer. This value must be a number.
6. Enter the Answer Range. If the answer must be exact for Students to receive credit, enter 0. Any value that is less than or more than the Correct Answer by less than the Answer Range value will be marked as correct.
7. Complete the question by adding optional feedback for correct and incorrect answers. Assign the question metadata.
8. Click Submit to add the question to the assessment.
File Response Questions

About File Response Questions

Users upload a file from the local drive or from the Content Collection as the answer to the question. This type of question is graded manually. This question type is a good option if the Instructor would like Students to work on something before a test and submit it with a test, or if the response to the questions is expected to take a long time to read. Submitting the answer this way allows the Instructor to read and grade the question without worrying that the browser will time out.

Note: Short Answer and Essay questions may also be used for questions that may require a shorter answer from a Student. These questions types must also be manually graded. Other Question types that allow user input are File Response, Fill in the Blank, and Fill in Multiple Blank.

Create a File Response Question

Follow these steps to create a File Response question.

1. Open the Test Canvas for an assessment.
2. Select File Response from the question type drop-down list. Click Go.
3. Enter the Question Text.
4. Assign a Point Value. Complete any advanced features for the question as defined by the Creation Settings of the assessment.
5. Assign the question any metadata.
6. Click Submit to add the question to the assessment.
Hot Spot Questions

About Hot Spot Questions

Users indicate the answer by marking a specific point on an image. A range of pixel coordinates is used to define the correct answer. Hot Spot refers to the area of an image that, when selected, yields a correct answer. The following are some examples of uses for this type of question:

- Anatomy - to locate different parts of the body
- Geography - to locate areas on a map
- Foreign Language - to select different articles of clothing

Create a Hot Spot Question

Follow these steps to create a Hot Spot question.

1. Open the Test Canvas for an assessment.
2. Select Hot Spot from the question type drop-down list. Click Go.
3. Enter the Question Text.
4. Assign a Point Value. Complete any advanced features for the question as defined by the Creation Settings of the assessment.
5. Enter the path to the file in the Attach Local File field under the Upload Image heading. Make sure to upload the image in the correct field. Remember that Creation Settings allows uploading a file as part of the Question Text.
6. Click Next. The uploaded image will appear.
7. Click the mouse and drag it to create a rectangle over the correct answer. When Students select a point within the rectangle they will receive credit for a correct answer. The area of the hot spot is defined by pixels. Click Clear to remove the hot spot and select a new hot spot.
8. Complete the question by adding optional feedback for correct and incorrect answers. Assign the question a category or other metadata.
9. Click Submit to add the question to the assessment.
Fill In Multiple Blanks Questions

About Fill In Multiple Blanks Questions

This question type builds on fill-in-the-blank questions with multiple fill in the blank responses that can be inserted into a sentence or paragraph. Separate sets of answers are defined for each blank. This question type may be used if there are multiple variables, such as "What color is the Italian flag?" This question type is also useful in foreign language classes. In this case the identifier and adjective may be left blank in a sentence, so as not to give away the gender of an object.

Create a Multiple Fill-in-the-Blanks Question

Follow these steps to create a Fill In Multiple Blanks question.

1. Open the Test Canvas for an assessment.
2. Select Fill In Multiple Blanks from the question type drop-down list. Click Go.
3. Enter the Question Text. Enter each blank as a variable surrounded by square brackets. For example, William [blank_1] wrote Romeo and [blank_2]. Variables should be composed of alphabets, digits (0-9), periods (.), underscores (_) and hyphens (-). All other occurrences of the opening rectangular brace ("[") character should be preceded by the back-slash ("\") character. Variable names must be unique and cannot be reused.
4. Assign a Point Value. Complete any advanced features for the question as defined by the Creation Settings of the assessment.
5. Click Next.
6. A list of variables found in the question will appear. Enter one or more correct answers for each variable.
7. Complete the question by adding optional feedback for correct and incorrect answers. Assign the question a category or other metadata.
8. Click Submit to add the question to the assessment.
Jumbled Sentence Questions

About Jumbled Sentence Questions

Users are shown a sentence with a few parts of the sentence as variables. The user selects the proper answer for each variable from drop-down lists to assemble the sentence. Only one set of answers is used for all of the drop-down lists. This type of question may be useful when teaching about proper grammatical order in a sentence, such as the location of a noun, verb, or adjective.

Create a Jumbled Sentence Question

Follow these steps to create a Jumbled Sentence question.

1. Open the Test Canvas for an assessment.
2. Select Jumbled Sentence from the question type drop-down list. Click Go.
3. Enter the Question Text. Enter each blank as a variable surrounded by square brackets. Variables should be composed of alphabets, digits (0-9), periods (.), underscores (_) and hyphens (-). All other occurrences of the opening rectangular brace (“[“) character should be preceded by the back-slash (“\”) character. Variable names must be unique and cannot be reused.
4. Assign a Point Value.
5. Select the Number of Answers and enter a value for each. These values will appear in a drop-down list for each variable when users view the question. Enter the answers in the order they should display to Students in the drop-down.
6. Click Next.
7. The question will appear with the drop-down lists in place of the variables. Select the correct answers.
8. Complete the question by adding optional feedback for correct and incorrect answers. Assign the question a category or other metadata.
9. Click Submit to add the question to the assessment.
Opinion Scale/Likert Questions

About Opinion Scale/Likert Questions

Question type based on a rating scale designed to measure attitudes or reactions. This type of question is popular to use in surveys in order to get a comparable scale of opinion. Users indicate the multiple choice answer that represents their attitude or reaction. When the Instructor creates an opinion scale question, six answer fields are pre-populated with the following answers:

- Strongly Agree
- Agree
- Neither Agree nor Disagree
- Disagree
- Strongly Disagree
- Not Applicable

Create an Opinion Scale/Likert Question

Follow these steps to create an Opinion Scale/Likert question.

1. Open the Test Canvas for an assessment.
2. Select Opinion Scale from the question type drop-down list. Click Go.
3. Enter the Question Text.
4. Assign a Point Value.
5. Determine how the answers will be displayed by selecting Answer Numbering and Answer Orientation.
6. Check Allow Partial Credit and options will appear under each answer to assign a percentage of points possible.
7. The Answer fields are pre-populated with values on a Likert scale. Select a correct answer and change any of the answer values.
8. Complete the question by adding optional feedback for correct and incorrect answers. Assign question metadata.
9. Click Submit to add the question to the assessment.
Short Answer Questions

About Short Answer Questions

Short Answer questions are similar to essay questions. The length of the answer can be limited to a specified number of rows in the text box. Essay questions, Short Answer questions must be graded manually.

The number of rows is meant as a guideline when entering an answer, it does not impose an absolute limit on answer length.

Create a Short Answer Question

Follow these steps to create a short response question.

1. Open the Test Canvas for an assessment.
2. Select Short Answer from the question type drop-down list. Click Go.
3. Enter the Question Text.
4. Assign a Point Value.
5. Select a number of rows for the answer.
6. Enter an example of a correct answer to assist Graders.
7. Complete the question by adding optional feedback for correct and incorrect answers. Assign question metadata.
8. Click Submit to add the question to the assessment.
Either/Or Questions

About Either/Or Questions

Users are presented with a statement and asked to respond using a selection of pre-defined two-choice answers, such as:

- Yes/No
- Agree/Disagree
- Right/Wrong

This question type is very useful in Surveys to gage user's opinions. It is a slight variation on the True/False question type, except more descriptive and meaningful answers may be used.

Create an Either/Or Question

Follow these steps to create an Either/Or question.

1. Open the Test Canvas for an assessment.
2. Select Either/Or from the question type drop-down list. Click Go.
3. Enter the Question Text.
4. Assign a Point Value.
5. Click the Correct Answer and select a positive value and a negative value from the drop-down lists.
6. Complete the question by adding optional feedback for correct and incorrect answers. Assign the question metadata.
7. Click Submit to add the question to the assessment.
Quiz Bowl Questions

About Quiz Bowl Questions

Quiz Bowl questions are a way to add fun and creativity to tests, such as self assessments or in-class contests. The user is shown the answer and responds by entering the correct question into a text box. An answer must include a phrase and a question word, such as whom, what, or where, to be marked as correct. For example, the question may be "The person who invented the cotton gin", with the answer being "Who is Eli Whitney?" Partial credit may be given if the question word is not included in the answer.

Create a Quiz Bowl Question

Follow these steps to create a Quiz Bowl question.

1. Open the Test Canvas for an assessment.
2. Select Quiz Bowl from the question type drop-down list. Click Go.
3. Enter the Question Text.
4. Assign a Point Value.
5. Click the Allow Partial Credit and enter a percentage of credit. This is the amount of credit that will be given to answers that include the correct phrase but do not include the correct interrogative word.
6. Select the Number of Interrogative Words. Enter each acceptable interrogative word in the fields below. One of these words must appear in the response for the Student to receive full credit.
7. Select the Number of Answer Phrases. Enter each acceptable phrase into the fields below. One of these phrases must appear in the response for the Student to receive any credit.
8. Complete the question by adding optional feedback for correct and incorrect answers. Assign question metadata.
9. Click Submit to add the question to the assessment.
Add/Modify Random Block

Overview

Random Blocks enable the Instructor to use a random selection of questions from a Pool. Be aware that it is not possible to add a Random Block of questions from another Test or Survey.

Note: Random Blocks cannot be included in a Survey or a Pool.

Find this page

Click Add or Modify a question from the Test Canvas.

Fields

The table below details the fields on this page.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Search</strong></td>
<td></td>
</tr>
<tr>
<td>Search the pools below:</td>
<td>Select a Pool from which to draw the group of questions.</td>
</tr>
<tr>
<td>Choose question types to import</td>
<td>Select the check boxes next the question types to choose which to include in the Random Block. If All is selected no other options can be selected. If All is not selected one or more options may be chosen.</td>
</tr>
<tr>
<td>Number of questions to import</td>
<td>Enter the number of questions to include in the Random Block.</td>
</tr>
<tr>
<td>Points per question</td>
<td>Enter the number of points each question in the Random Block will be worth.</td>
</tr>
</tbody>
</table>
Upload Questions

Overview

Instructors may import files containing questions into an Assessment.
The questions in the uploaded file must match the file structure explained below. The file may
include Essay, Ordering, Matching, Fill in the Blank, Multiple Choice, Multiple Answer, and
True/False questions.

Note: Files with questions may be imported into Pools and Surveys. When
uploaded to a Survey, the correct/incorrect answer Assignment is ignored, but
the file must follow the same format as described for Tests and Pools.

Please note that this feature is not available in Blackboard Learning System – Basic Edition.
The following information is important to note when importing Assessment questions:

- Once uploaded, questions can be manipulated like other questions created within the
  Assessment.
- If there is an error in a question within a file, only the question with an error will fail to
  upload. Questions without errors will upload successfully.
- The system does not check for duplicate questions. It is up to the Instructor to
  manage this aspect of the Assessment questions.

Find this page

Select Upload Questions from the Test Canvas.

Function

Click Browse and locate the file that is to be uploaded to this Assessment. All of the questions in
this file will be added to the Assessment.

Point Value

When questions are imported they automatically default to the point value set in Creation
Settings. If a default value has not been chosen in Creation Settings questions will automatically
have a point value of ‘0’ and Instructors must then enter a point value for each question.

File Structure

Questions in the file must conform to a specific structure to be uploaded to an Assessment
successfully. Each field in the file is separated by a tab. Each row is a separate question.
<table>
<thead>
<tr>
<th>Question Type</th>
<th>Structure</th>
</tr>
</thead>
<tbody>
<tr>
<td>Multiple Choice</td>
<td>’MC’ TAB question text (TAB answer text TAB ‘correct’ or ‘incorrect’)</td>
</tr>
<tr>
<td></td>
<td>Text within () may be repeated for each of the answers that are part of the Multiple Choice question. The maximum number of answers is 20.</td>
</tr>
<tr>
<td>Multiple Answer</td>
<td>’MA’ TAB question text (TAB answer text TAB ‘correct’ or ‘incorrect’)</td>
</tr>
<tr>
<td></td>
<td>Text within () may be repeated for each of the answers that are part of the Multiple Answer question. The maximum number of answers is 20.</td>
</tr>
<tr>
<td>True/False</td>
<td>’TF’ TAB question text TAB ‘true’ or ‘false’</td>
</tr>
<tr>
<td>Essay</td>
<td>’ESS’ TAB question text TAB [example]</td>
</tr>
<tr>
<td></td>
<td>Text within [] is optional. The Instructor may choose to add a sample essay question or leave this blank.</td>
</tr>
<tr>
<td>Ordering</td>
<td>’ORD’ TAB question text (TAB answer text)</td>
</tr>
<tr>
<td></td>
<td>Text within () may be repeated for each of the answers that are part of the Ordering question. The maximum number of answers is 20.</td>
</tr>
<tr>
<td></td>
<td>The order entered in the file is the correct order. The system will randomly order the answers.</td>
</tr>
<tr>
<td>Matching</td>
<td>’MAT’ TAB question text (TAB answer text TAB matching text)</td>
</tr>
<tr>
<td></td>
<td>Text within () may be repeated for each of the answers that are part of the Matching question. The maximum number of answers is 20.</td>
</tr>
<tr>
<td></td>
<td>The system will randomly order the answers and their question. When uploading a matching question, there must be a one-to-one relationship between questions and answers. If not, correct answers may be marked incorrect if more than one answer has the same value.</td>
</tr>
<tr>
<td>Fill in the Blank</td>
<td>’FIB’ TAB question text (TAB answer text)</td>
</tr>
<tr>
<td></td>
<td>Text within () may be repeated for each of the answers that are part of the Fill in the Blank question. The maximum number of answers is 20.</td>
</tr>
<tr>
<td>File Response</td>
<td>’FIL’ TAB question</td>
</tr>
<tr>
<td>Numeric Response</td>
<td>’NUM’ TAB question TAB answer TAB [optional]Tolerance</td>
</tr>
<tr>
<td>Short Response</td>
<td>’SR’ TAB question TAB sample_answer</td>
</tr>
<tr>
<td>Opinion/Likert Scale</td>
<td>OP TAB question</td>
</tr>
<tr>
<td><strong>Question Type</strong></td>
<td><strong>Structure</strong></td>
</tr>
<tr>
<td>-----------------------------------</td>
<td>-------------------------------------------------------------------------------</td>
</tr>
</tbody>
</table>
| Multiple Fill-in-the-Blank        | FIB_PLUS TAB question TAB variable1 TAB answer1 TAB answer2 TAB variable2 TAB answer3  
|                                   | The format consists of a list of variable-answers where each variable-answer is composed of the variable name and a list of correct answers for that variable. variable-answers are delimited by an empty field. |
| Jumbled Sentence                  | JUMBLED_SENTENCE TAB question TAB choice1 TAB variable1 TAB choice2 TAB TAB choice3 TAB variable2  
|                                   | The format consists of a list of choices-answers where each choice-answer consists of the choice followed by the list of variables for which that choice is the correct answer. An empty field indicates the end of a choice answer. A choice immediately followed by an empty field indicates that that choice is not the correct answer for any variable. |
| Quiz Bowl                         | QUIZ_BOWL TAB question TAB question_word1 TAB question_word2 TAB phrase1 TAB phrase2  
|                                   | The format consists of a list of valid question words followed by an empty field and a list of valid answer phrases. |
Search Pools and Assessments

Overview

This section discusses how to select specific questions from Pools and other Assessments. Instructors may choose questions based on category, keyword and question type.

Find this page

Click Search Pools and Assessments for a question from the Test Canvas page.

Field

The table below details the fields on this page.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Search the pools and assessments below</td>
<td>Select a Test or question Pool from which to select the questions.</td>
</tr>
<tr>
<td>Question Types</td>
<td>Select All to choose questions from all question types or select one or more question types.</td>
</tr>
<tr>
<td>Related Categories</td>
<td>Select a category to choose questions from. This option is on the Advanced tab.</td>
</tr>
<tr>
<td>Keywords</td>
<td>Enter keywords to search for questions. When entering more than one keyword, insert a comma between keywords. If more than one keyword is entered, only questions that have all of the keywords will be retrieved. This option is on the Advanced tab.</td>
</tr>
</tbody>
</table>

Points

Once questions from a Pool are imported to a Test a point value must be assigned. If a default point value has been set in Test Creation Settings the imported questions will automatically be set to the default.

Choose Questions

Select one or more questions to include on the Test. Click Preview to view the question as it will appear on the Test.

Instructors may select 20 questions at a time from a Pool or another Assessment to add to a Test. When the search is performed 20 questions will appear on a page, if more the 20 questions are found during the search, multiple pages may be viewed. Instructors may only select and submit questions from one page at a time. For example, if the search returns three pages of questions, the Instructor must select the questions to add on the first page and click Submit, then proceed to the second page of the search, select questions on that page and select Submit, and so on until finished.
