Adobe Photoshop CC for Professionals- The First Step
This workshop introduces practical methods for working with the software. Carefully crafted tutorials provide an overview and reinforce the student’s understanding of Photoshop tools, including Layers, Making Selections, Masking, Basic Color, the Type Tool, Extrac- tion Filter, Image Resolution, and the conversion from RGB to Grayscale. Image repairs with the Healing Patch and Clone Stamp will be explored. The ability to create unique support images without a camera or scanner will be introduced. Lots of discussion and guided demonstrations by a Photoshop expert will encourage class participation in an atmosphere of mutual support.

Maya for Professionals-The First Step
Learn the concepts and basic tools for creating imagery in 3D using Autodesk’s Maya. Starting with a road-map to the main interface, students will learn how to construct shapes and geometry using polygons. Once built, they will learn how to “texture” these polygons so that they appear to have surface detail. How to use the lighting tools to illuminate the objects they’ve created. We will discuss the basics of animation, making our objects and camera move through time. Finally, we will learn “rendering” or the final look of our work to a finished, playable animation file which each student will have created.
