Course profiles are the property of the College.

No faculty ownership rights to a course apply when the course is not an original creation of the faculty member.

The fact that a faculty member has developed an online course for a specific class does not preclude another faculty member from developing and teaching an online course for the same class.

Class size maximums for the same course should be the same district-wide.

2. A faculty member who applies to teach an approved online course must complete the online training provided by the College.

Normally, a full-time faculty member who teaches online will perform at least 3-6 hours of classroom instruction per semester/term as part of his/her teaching load as conditions warrant. Exceptions may be considered by the Department Chair and Dean if

requested in advance by the faculty member. The duties and responsibilities of full-time faculty as provided in the Joint Resolution and Board Policy/Administrative Procedures remain in effect for full-time faculty who teach online courses. The ten (10) hours for student consultation and assistance (as provided in Article IX C 3 of the Joint Resolution) must take place on campus.

It is recommended that the Board approve the revised Engineering Science Associate in Science degree approved and submitted by the District Curriculum Committee.

**Program: Engineering Science  
Associate in Science**

**Campus: FP, FV, M**

**Effective: Summer, 2007**

### Impact Statement

This revision will remove CHM204 as an elective course. The course has not been offered for many years and has been replaced by CHM206 and CHM 210 and is being deactivated.

COM101 is added to enhance the General Education Elective requirement selection.

The revision also adds two IS courses that some Engineering programs at transfer universities prefer to accept for the computer programming component. This will provide the students with a positive impact allowing the student to apply the credit for IS computer programming courses to their AS degree.

It is recommended that the Board approve the revised Surgical Technology Certificate of Proficiency approved and submitted by the District Curriculum Committee.

**Program:** Surgical Technology  
**Certificate of Proficiency**  
**Campus:** FP  
**Effective:** Fall 2007

**Impact Statement**

Elimination of course ST: 207 *Technological Sciences for the Operating Room* will reduce program requirements by one credit hour. Course material will be integrated into other program courses. This change will not affect students who are currently in the program, as they will graduate before the catalog is changed. As this is a one year program that starts in the fall, future program students will not be affected by the change either, as the new catalog will reflect the new curriculum.

The consultants listed were previously selected by a committee that evaluated several firms based upon professional qualifications, previous educational clients, experience with renovation/repair projects, knowledge of ADA project requirements, experience with open-end consulting agreements and their schedule of fees.

Presently, these firms are performing a variety of technical, architectural, engineering, construction management, and testing services pertaining to various capital projects for renovation, repair and maintenance of college facilities throughout the district. These agreements allow us to respond quickly to facilities consulting demands. The fees will be expended on an “as needed” basis for outside consulting work in response to Physical Facilities’ projects and/or educational program demands. Charges for each individual project will be handled separately by setting NTE limits at the beginning of each job with the final billings to be on a “time charged” basis. The cost of the consulting fees has been included in the estimates for the individual capital projects listed on the approved district-wide Capital Allocation Plans.

**Reason:**

We are requesting the additional amount of funds and extension of each contract in order to manage the future workload for new capital projects, to expedite certain items by assigning the work to outside consultants, to handle various new planning projects, and because the technical scope of some projects are beyond what can be performed by our “in-house” staff of designers. Much of our ADA work, major renovations and larger capital projects will need to have the design work outsourced in order to meet the deadlines for fiscal year, state funding, etc. Recently, we also added consultants that specialize in testing, environmental, roofing services, and construction management. The amount requested this year has increased in order to account for inflation and a greater demand for outside consultants.

**Funding:**

Funds will come from current capital, auxiliary, parking, rental and external funds depending upon the actual location and type of the project.

**Executive Summary January 18, 2007  
(Financial Results Through 12/31/2006)****Revenue**

The Budget Status Summary Report shows revenue of \$86.3 million or 57.1% of the budgeted revenue as compared to \$86.1 million or 58.2% of the budget for the prior year. Three of the four revenue lines, with student fees being the exception, are contributing to the dollar increase in total revenue. It is still too early in the spring semester registration cycle to determine if student fees will be less than the budget for FY '07.

**Expenditures**

Expenditures are \$62.6 million or 46.1% of the budgeted expenditures as compared to \$62.6 million or 47.6% for the prior year. The decrease in the operating expense category is offsetting the increases in salaries and wages and staff benefits to keep total expenditures for FY 2007 about the same as the prior year's.

**Transfers**

Transfers are at \$13.8 million or 86.6% of the budgeted transfers as compared to \$14.4 million or 86.7% of the budgeted transfers for the prior period. The decrease in the total transfers amount is due primarily to the reduction in planned transfers to capital.
